CENTIMETRES

Porcelain tile catalogue 2026 Feinsteinzeug-Katalog 2026 Catalogo gres porcellanato 2026

WELCOME · WILLKOMMEN · BENVENUTI

Surfaces with quiet texture.

Martiny Global presents its 60 × 120 cm matt collection: 91 designs drawn from two worlds, natural stone and wood, every one finished with a soft, tactile matt surface. Large format, few joints, and a grip and warmth that suit floors people actually walk on. This catalogue brings both ranges together in one consistent format: find your colour family, compare the designs, and see them in real spaces.

DE

Martiny Global präsentiert die matte Feinsteinzeug-Kollektion im Format 60 × 120 cm: 91 Designs aus zwei Welten, Naturstein und Holz, jedes mit einer sanften, griffigen matten Oberfläche. Großformat, wenige Fugen und eine Griffigkeit und Wärme, die zu Böden passen, auf denen tatsächlich gegangen wird. Dieser Katalog fasst beide Sortimente in einem einheitlichen Format zusammen: Farbfamilie wählen, Designs vergleichen und in realen Räumen erleben.

IT

Martiny Global presenta la collezione opaca nel formato 60 × 120 cm: 91 design tratti da due mondi, pietra naturale e legno, tutti con una superficie opaca, morbida e materica al tatto. Grande formato, poche fughe e una aderenza e un calore adatti a pavimenti su cui si camminerà davvero. Questo catalogo riunisce entrambe le gamme in un formato coerente: scegli la famiglia cromatica, confronta i design e scoprili in ambienti reali.

Matt surfaces give a soft, natural grip underfoot, which is why this collection includes stone- and wood-look designs suited to bathrooms, terraces and other areas where slip resistance matters.

DE
Matte Oberflächen bieten einen angenehmen, natürlichen Grip beim Gehen. Diese Kollektion umfasst daher Naturstein- und Holzoptiken, die sich für Bäder, Terrassen und andere Bereiche eignen, in denen Rutschhemmung wichtig ist.

IT
Le superfici opache offrono una presa naturale e morbida al calpestio: per questo la collezione include design effetto pietra e legno adatti a bagni, terrazze e altre aree dove la resistenza allo scivolamento è importante.
